Form 2 AN ABSTRACT OF THE "COSMIC CUBE" DEVICE.

The "Cosmic Cube" creates cubical wavefields by an entirely novel method of technology. Working across a time axis, it correctly identifies and cristalizes all components involved in any project. It is universally applicaable and quantums the competitive edge of the user. It establishes a mathematically precise cause-effect solution to within .0007% accuracy by the use of 72 interrelated electro-magnetic circuits. These have 144 entree-exit windows which can allow a single or multiple user (individual, group, profession, corporation, village, town, city, province, nation etc.) to plot a precise course of action, and get a full cause-effect diagram, graph, printout, bilan spreadsheet, free of human error, before a project is started. In scale it runs from the simplest maths of 2+2=4 to $E=mc^3$.

FORM 3 - A DISCLOSURE.

The Cosmic Cube is based on the mathematics of $E = mc^3$. It provides a safe interdimensional passageway to the inescapable forward step in evolution that befronts our specie. The Cube has had 12 years of intensive field testing. The original draught was highly commended by Buckminster Fuller. The inventor has thirty one supportive copyrights which cover the investigative journey in a 22 year post doctorate study of absolute verification of the claims listed herein.

In his recent analysis of the Universe, Stephen Hawkins said that the final solution to the mystery would be understandable and applicable to all men. The actual crossing of this ultimate frontier would be made by Theophysics and Metaphysics.

The Cosmic Cube operates on electromagnetism. The relationship between (+1), The Irristible Force, and (-1) The Immovable Object. The construction of a Pi ray Bridge between dimensions. HUMAN WILL, the 5th and most powerful Universal Force, is a built-in homing instinct to the Unified Field, of his origin.

The Cube is geared to synthesise this 5th Force by means of its 72 circuits and 144 access windows. It consists of a number of light cones, each of a different range of VPS, running through blue to indigo (midnight blue) at the vibrational range of 55 x 10^{31} per second. Each window accesses icosahedron facets deep. Each facet understands 144 sub programs in dodecahedron quantums.

Any skilled person can test the device by placing blue, green, yellow, orange, red, violet flimsies over a black and white diagram. The entree exit windows of the Cube can handle past, present or future with equal dexterity.

In its MEGA application, the Cube allows the operator to sit in the control seat (Circuit 2.3/3.2) of a translucent "Planetarium" and replay the "Alpha-Omega" theme, to and from any starting point along the axis of time. The operator then passes through a colour cone readout of the cause-effect of every event in the time-span under review, by simply pressing the (+1) or (-1) button until equilibrium is attatined at (+1)+(-1)=0. At this point the operator can view the "Cristal Cube" or solution matrix.

Collective viewing and operation by a group, (city, professional body, nation, what have you) can be made by the utilization of the IMAX screen, such as we have in the Museum of Man, in Hull, Quebec. The Cube is multilingual, in that it employs merging holographic images to manifest itself, in terms that any adult or even child can understand, at the speed of light. It is in this way that linear thought-action is gently reorganized into cubicle wavefield thought-action.

The "Blue Cube" is based on the thesis that Nature (Gaia) is a single living entity, governed by an over-riding psybernetic direction finder programmed to EVOLUTION. (+1), "The Scarlet Woman" label provided for man in his kindergarten-adolescence. In the course of this "Alpha-Omega" program run, "Bootdisk Genesis 1", not one microscopic fragment of energy is wasted. Every leaf, corpse, life-step taken by any moving or unmoving natural object is evolutionary bound, in an energy exchange cycle between the various elements. The idea that man is not a part of this cycle is ludicrous.

In $E=mc^3$, the Universal Equation, this aspect is called W=WORK.

As the pace of evolution proceeds, the Biological "Red Queen Hypothesis", as described in the story of "Alice in Wonderland" begins to manifest, i.e. "Faster, faster little feet" cries Nature as she feels the electromagnetic tug of her objective, the Unified Field Force, in all her human (macroscopic) parts.

F=Force, "The Force is with us"said a recent U.S.A. President. The F=Force is light, by which all life evolves. In kindergarten this Light was called "Lucifer" the (+1) Factor, which is in total opposition to the (-1) element of the "Rock of Ages", and the character known as Christ-Osiris, which postulates "The Father and I are One".

These two elements (+1) + (-1) are Nature's working tools. In the Cosmic Cube these are postulated as zillions of tiny fish-tails, covering a distance marathon. D=Distance covered by the M=Mass in growing A=Acceleration to attain a specific V=Velocity, while building a cluster of diverse types of civilizations and cultures across the Axis Map of "Time".

The Universe is a growing dynamic en tity. The Unified Field Force concept provides a full and total solution to all human ills as we extract the essence of all that is GOOD from the matrix of earth history. From the opening gambit of Genesis I :-

(+1) FORCE (countless billions of goldfish tails) has propelled the planetary mind over evolutionary DISTANCE at a growing VELOCITY carrying the MASS by means of WORK and hi-tec ACCELERATION into conjunction with the UNIVERSAL CONSTANT (-1) ∞ = Home again in INFINITY.

F=FORCE D=DISTANCE V=VELOCITY M=MASS W=WORK A=ACCELERATION C=CONSTANT (Speed of Light). Fission builds a diverse civilization; Fusion restores it.

T=TIME. Time is a weird wave, moving first forward then backward till (+1)+(-1) The scroll of "TIME" rolls back when the four states of the electron are complete; cognition; Purpose; Love; Action. Action is the karmic fold or "tesseract in timelessness" as YIN-YANG, PODE-ANTIPODE, SHIVA-SHATKI, cancel each other out.

When V=C, W=INFINITY. That is to say Man has a New Vision of the expanding Universe. By passing into higher mind-states where you can look back at (-T) (reverse time), to gain extra terrestrial perspective. Here mind can separate the negative and the positive, matter and antimatter. (-1)+(+1) gamma particles permit reduction of the mass to a single positron, with instant LIght-Fusion, or the establishment of Heaven on Earth as per terms of Arc of the Covenant.

$$W = \frac{Mc^2}{1} \times \frac{3/2}{-\frac{V2}{2}}$$ (the fuel force of ego in motion, the Red Queen hypothesis in biology)

$W = Mc^2$ $D = W + Mc^2$ when $W = \infty$

$$E = \frac{Mc^2}{V=W} = (+1)+(-1) = 0$$ $\therefore$ 2=0 = YIN YANG ERA

$\therefore$ 5 = 6; 7 = Pure existance, consciousness, bliss

as all resistance factors to L.O.V.E. are overcome; 8 = STOP TIME

For at this point, the PODE, The Exemplii(Elohim, Christos et al) have achieved the conquest of the ANTIPODE, (humanity in the process of evolution to a new biological specimen.) ie

The gigantic Alchemy project of making animal man into a God as described by Jehovah, through Isaiah (Ch.19 v.25) is complete ... "BLESSED BE EGYPT, MY PEOPLE (with the implication of their extra terrestrial origin), & UR, THE WORK OF MY HANDS, & ISRAEL MINE INHERITANCE..."

2010302

Because man himself, and all knowledge pertaining thereto, is all part of the same phenomena, "Functional Magic" is required to put all the pieces of the cube together. Namely:

METAPHYSICS: The Radiant One says of Itself, "I AM ALPHA & OMEGA". This is the Circuit of 'TIME'(1.12/12.1) on the Cube. Universal Mind (The Holy Spirit) is everywhere. It represents SPACE. The Unified Field Force, (The Christ Child of Earth, The Second Coming, Millenium, at Point Zero) is a DIMENSION of BEING. That is to say the REALIZATION of this TRINITY at the relativity of awakening, at E=mc .

PHYSICS & ASTROPHYSICS: (as clearly known to ancient man by his records regarding the magnetic field). Here gravity is defined as movement and therefore "TIME". Electromagnetism defined as a field force, occupying SPACE translates as "The Holy Spirit", highly active towards acceleration, velocity, or "The Red Queen", treadmill equation in biology.

Within the Cosmic Cube, the four fundamental forces in Nature act in synthesis. There is Strong Interaction and Weak Interaction, as demonstrated by the collision of the (+W) meson and (-W) meson interactingb with the Z meson (Circuit 12.5/5.12). This conscious Zarg Force breaks up the social fabric, (brings man out of the House of Bondage in the Time Warp) at higher energies that are no longer held prisoner by gluon.

It is no secret that matter and energy are relative dimensions.

Time cannot be separated from Space, nor can dimension, as the relativity of the observer cannot be separated from time and space under noraml circumstances. But within The Cosmic Cube, man is led to the actualization of the equation E=mc and thus able to relate time, space and dimension at Pure Light Fusion with the SUPRAORDINATE FACTOR of Creative Intent. The Universal Bank Manager, so to speak.

THEOPHYSICS: Circuit 2.10/10.2 Bonding by fire and ice, explains the "Wholebrain Experience" of seeing the fundamental forces as a Unified Field Force, when HUMAN WILL, the 5th and Most Powerful, Universal Force is brought into a Supraconscious state of cubed intelligence, in a New Dimension of Being, at $E=mc^3$.

PSYCHOLOGY: (+1), YANG, the driveshaft, human will, was depicted by Sigmund Freud as "Hells Own Worm" which governs the forward thrust of evolution which the 4 stages in the growth cycle of the electron are in progress. Then comes the 'stroke of midnight' phenomena, and Ego poleshifts from creation to "I Am become death, destroyer of Worlds" at the release of $E=mc^2$.

RELIGION: Teaches that (-1), YIN, the path of renunciation, ie "Love your neighbour as yourself, give coat with cloak etc" is the subect of all religious philosophy. YIN's role is to balance the forward thrust of the atomic weight, and to shift the

critical MASS. It does this by holding steady, as an immovable c' 'ect. (+1) passes through the (-1) web into an ongoing state o. prosperity, equilibrium, and instant evolution. 2010302

MYTH & PHILOSOPHY, key elements in the nourishing, educational placentic envelope in which Earth floats, as in ambiotic fluid, repeat the identical theme of the DNA climb up the"beanstalk", first to face the "Giant", then to enter into a higher kingdom. Circuit 11.8/8.11 deals with CORRELATIONS of all input x time.

These disciplines, when polished of negative accumulations, point like arrow heads to an inescapable conclusion. Genesis One was a 5th Generation computor game, played by some evoltionary minded beings who were not locked in to the yoke of "TIME". There is not just a few arrows, there is a forest of arrowheads pointed directly at our old ship, "Noah's Ark II".

It like getting caught in a searchlight beam without your figleaf. This is not a local phenomena. It is a Universal event. Man is given the illusion of potency to give mind the strength to face His Maker, from whence to become a SUPERBEING, a fully matured co-partner in the ongoing process (W=work) of Co-creation.

Because evolutionary speed runs on the "Treadmill of Bigfoot", when (+1) and (-1) get into their ultimate collision, the whole earth fabric is torn apart. The "White & Black" Brotherhoods supervise this planetary operation. (See the Black Cube, in myth, "Battlestar Galactica", in computer program, MEGATRON).

Extended sound, light, and coloured holographic images on an IMAX screen, with the printout of the maths running at the same time, leaves no doubt of the correlative evidence or MASS OF EVIDENCE, demonstrated by Creative Intelligence acting across Time & Space.

This is the REALIZATION that the device known as THE COSMIC CUBE can bring to any person. The software content is flexible to the level of audience ability to grasp, from nursery rhymes, to neo-theophysics. In brief it means man is off the wheel of karma and into Millenium.

Samples of coloured cone printouts are enclosed.

Extended sound, light, and coloured holographic images on an IMAX screen, with the printout of the maths running at the same time, leaves no doubt of the correlative evidence or MASS OF EVIDENCE, demonstrated by Creative Intelligence acting across Time & Space.

This is the REALIZATION that the device known as THE COSMIC CUBE can bring to any person. The software content is flexible to the level of audience ability to grasp, from nursery rhymes, to neo-theophysics. In brief it means man is off the wheel of karma and into Millenium.

In the past 26 years, I, Winifred Grace Barton, Ms.D., have copyrighted and published 31 books and course scripts which describe the details involved in assembling THE COSMIC CUBE. The most recent of these is "I AM, THE BOOK OF LIFE" c.291244, 1978, which forms Circuit 11.1/1.11, in conjunction with Circuit 3.8/8.3 of THE COSMIC CUBE. The development has cost in excess of $5 million. Over 200 people were involved in the project.

FORM 4 - CLAIMS.

1. The device known as THE COSMIC CUBE produces cubical wavefields of ultra-powerful energy by subtracting time and space from the human equation.

2. It erases the flaw in the cosmic mirror, by creating a reversal of the "Treadmill Equation", namely the Biological Law of birth and death.

3. It is capable of cross correlating all knowledge of all time, by discerning the cosmic physics contained in all ancient sacred writings, earth works, heiroglyphics.

4. It can roll up the scroll of human history, hold it up to the light for viewing as a worn out, fragmentary "snake-skin" to any individual, group, corporation, nation, in a user-friendly fashion.

5. It is an interdimenational bridge, known as the Pi ray bridge, in Physics, Theophysics, and Metaphysics.

6. It permits instant planetary escape from a 26,000 year "Time Warp", Genesis One, while simultaenously re-booting the whole earth system to Genesis Two.

7. Being a technically flawless cristal, it permits instant synchronization of its micro and macroscopic elements.

8. It bends linear light into cubical wavefields, or reunity with the Unified Field Force at (+1)+(-1)=0 = E=mc .

9. The device can locate and lock into the isotope line on the original map, so proving conclusively, the esistance of a Dominant Magnetic Sphere (-1) which governs the Universe.

10. The Cube validates the concept that any attempt to cheat, or express bias of any description, causes an equal and opposite, tort-retort effect of a deadly, anti-natural evolutionary error, called "STUPIDITY", or the dinosauer effect.

11. It can provide a matrix of the original systems analysis made of this local planetary potential, or in lay terms expose the "ARK OF THE COVENANT" manifesto.

12. In its user-friendly mode, it provides a series of time-locks to prevent brain damage, allowing the operator to act as if he/she were slowing uncovering a series of dials in a combination lock.

13. It guarantees safe passage through the "Ankh" or "Needles Eye", by referencing its activity to the description of Armageddon in the "Book of Revelations.

2010302

14. It is tamper proof, and foolproof.

15. By facing two tetrahedrons (+1)+(1), it allows the observer and that which is being observed on neutral gound, or in philosophy, permits a personal, face to face experience with The Radiant One.

16. It synchronizes the two electromagnetic webs, eliminating fission as (+1) bounces into (-1) and causing instant fusion of mind and matter.

17. In Circuit #9 it acts as a harvesting combine, sucking in the spinal tap of the planetary kundoline

18. The cube translates the life-cycle of the electron into lay terms that anyone can understand, by the "Fish-bowl" diagram.

19. It bares the principle of the morphogenetic field in its interaction with carbon particles (matter) to achieve a set goal.

20. It exposes the 33° Freemasonic exaltation of JABULON, the Great Architect of The Universe, which has been handed down in secret societies since the pre-dawn of human history.

20. Even in its simplest, 2+2=4 aspect, it provides retrospective vision; or/and can be verified on any level of technical competence, to any degree the user requires, by compressing the critical mass of that persons knowledge into a single "lotus pearl", "philosophers stone", or "cristal chip" and placing it properly in the Unifield.

21. Its amber cone is capable of producing high quality, clean, free, energy fuel, which can keep this planetary system running labour-free, perfectly balanced to forward thrust + equilibrium, maintenance-free, ever accelerating on the upward abundance curve, ad. infinitum.

22. It can do the same for any othe planetary system or sphere such as a space-craft, which engineering specs have been tested successfully on a trial run made in October '76 from Maple Ridge, B.C., when pictures were taken.

23. Circuit 4.6/6.4 has an automatic "Squelch Button" which is activated if the sphere loses one jot or tittle of equilibrium; so that even an inexperienced operator can locate a faulty valve.

24. In Circuit 10, the Cube automatically attracts and fuses, compatible life energies, and eliminates friction between them, by invisible electromagnetic cubical wavefields.

25. "Functional Magic" is an apt description of this device.

26. Being co-joined at the Point of Absolute Neutrality, at its central connection with the Unified Field, Circuit 4.4. the Cubes' internal memory, is geared to educate by thrust and parry, which forces the operator to the end, or cancellation of his/her clouded area of thought.

27. Circuit 2.10/10.2 describes the Biotronic wizardry of the Neutron, and the "Fire & Ice" theophysics undergone to attain the exact specifications of the Cosmic Cube, which acts as the lung to breathe in all bioinformation in the planetary noosphere, and filter it to equilibrium, (+1)+(-1) - breathed out to 0. Russian scholars and scientist have worked for decades on this thesis.

28. The inventor claims, that the electromagnetic or "Solar Cross" celestial balance scale ("Vengeance is Mine", saith The Lord) which measures each tort-retort, perfectly explains the mysterious instruction to "turn the other cheek" when assaulted is 100% indisputedly verified as a scientific verity, within The Cube.

29. I claim that the "Typical Users Results" can verify the multiple applications to which the device can be set.

30. That in cold pragmatic application, as a high grade bio-information exchange device, the Cube enhances signal to noise ratio, to give telepathic accuracy well beyond present methods.

31. The Cube will make its first national or corporate user, into a fast-forward track, debt free, highly productive, sane and contented grouping in the world; as it reduces the workload while increasing productivity, social services, cubed intelligence ratio in personnel for postive solutions.

32. That as a private video game it will be the most challenging and exciting game for synthetic unified field players all over the world.

In those days Egypt was known as "The Land of the Mr" which is the meridian triangle of the pyramid. (See "Kepha-A-Ra, c. 147795 Winifred G. Barton, 1974). In essence, "Mr" means a right angled triangle, with one angle of 36° and another of 54° of a pyramid whose hypotenuse is the apothem.. (page 39.). In Cube Geometry, the triangle is the basic building block, duplicating the Cosmos. This method of geodic survey was used for all planning in the ancient world. It was demonstrated by Chemist Dr. Marcel Vogel in a cristology thesis which won him a Nobele Prize, for the pyramidal "Five-brain cluster". The Cube's "Command Cristal" is built to these specifications. It resonates at V.P.S. 55×10^3 .

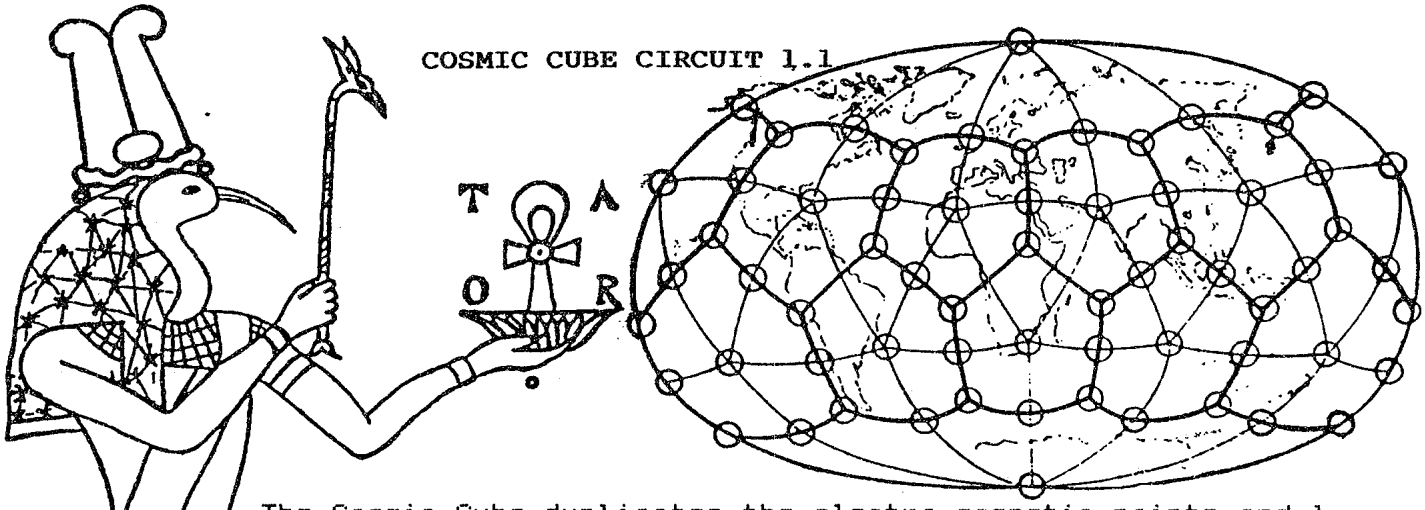
\TENT APPLICATION ITEM 84 - DRAWINGS. (extended for comprehension)

As, when in operation, the Cube projects light tachyons from its multi coloured cones, all operating at different V.P.S, up to VPS 55×10^{31}, which creates the effect of sunhursts of energy, which then separate into specific, and traceable electro-magnetic circuits, as defined by the 72 Circuit Board being patented, flat drawings can only give a one-dimensional image of how the "Big Foot Hologram" works.

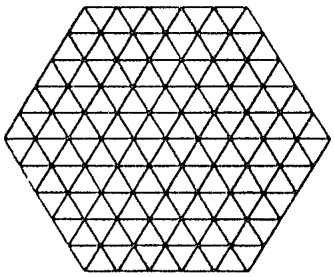
For the conscious mind is the slow tortoise. Each unique person can only select a limited, or less limited view of the speed of the images, according to the ego-bias of like-dislike. At the Point of the Electro-magnetic isotope line, the images of past, present, future, "qwiff-pop" (quantum wave function) from every direction. Yet its all one panorama. The enclosed drawings give an idea of how it works. It begins with Ancient Sites around the world and the common message they bring re $E=mc^3$ at $(+1)+(-1)=0$.

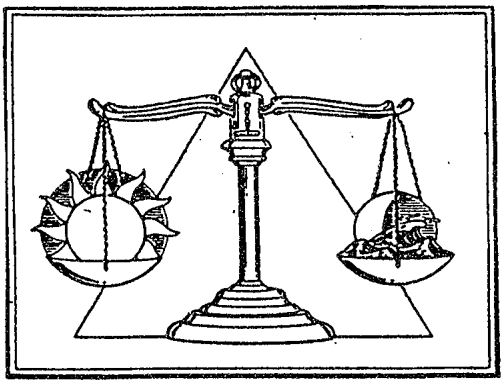
COSMIC CUBE CIRCUIT 1.1



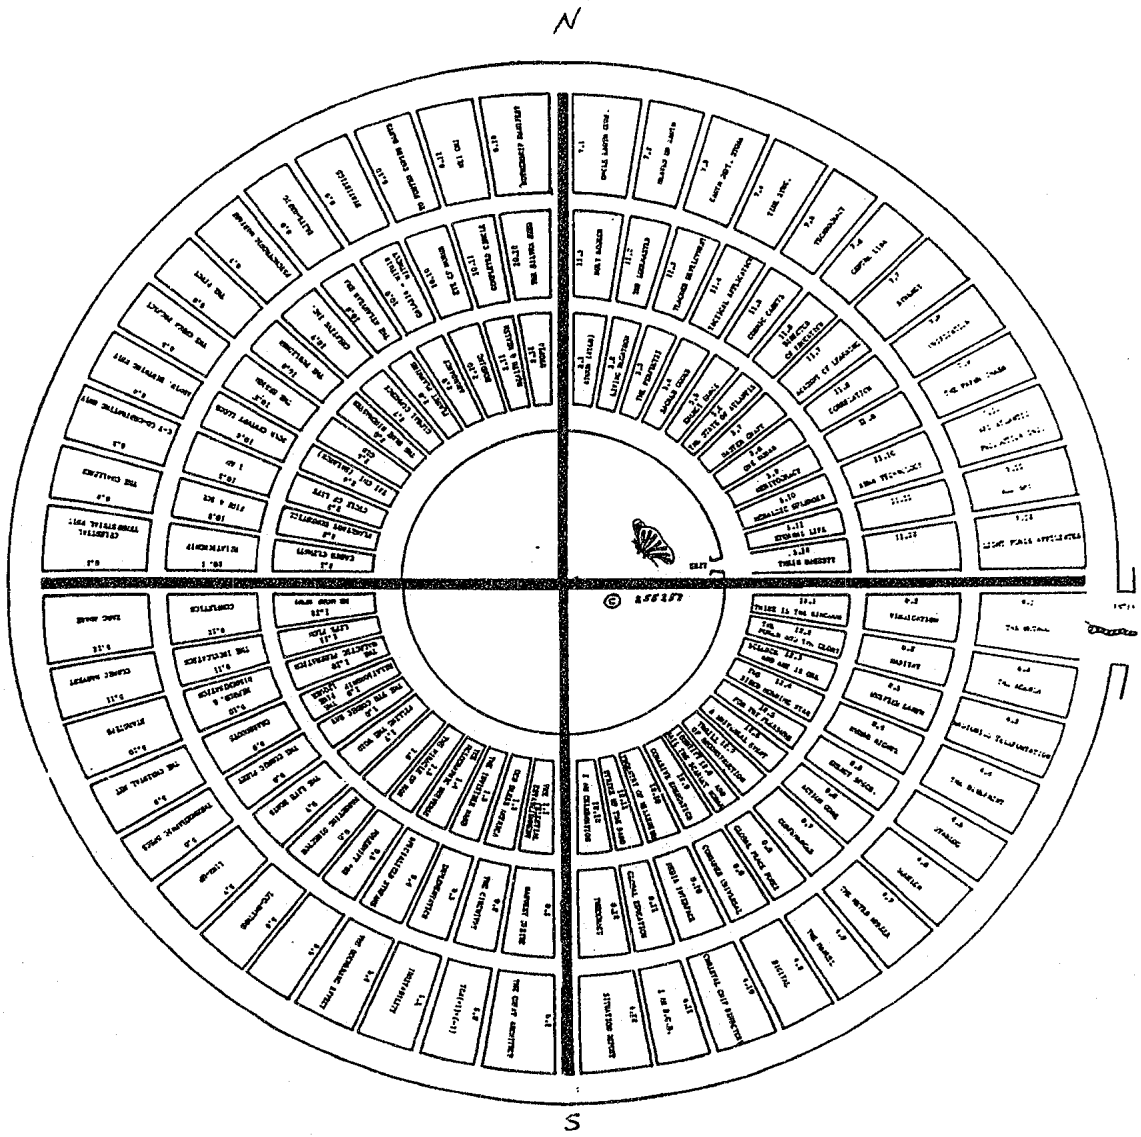
The Cosmic Cube duplicates the electro-magnetic points and ley lines discovered to surround the earth. These were discovered by Russian scholars upon transferring ancient religious sites from around the world onto a globe. The effect was like a football made up of PENTAGONS. An identiacal pentagon-like device was worn as the head-dress of the man-bird, Thoth, which carries the symbology of the Eastern Lotus, the Egyptian Ankh, and the Western Tora. These are all symbols of $(+1)+(-1)=0$ in the electro-magnetic force field, at $E=mc^3$

THE COSMIC CUBE



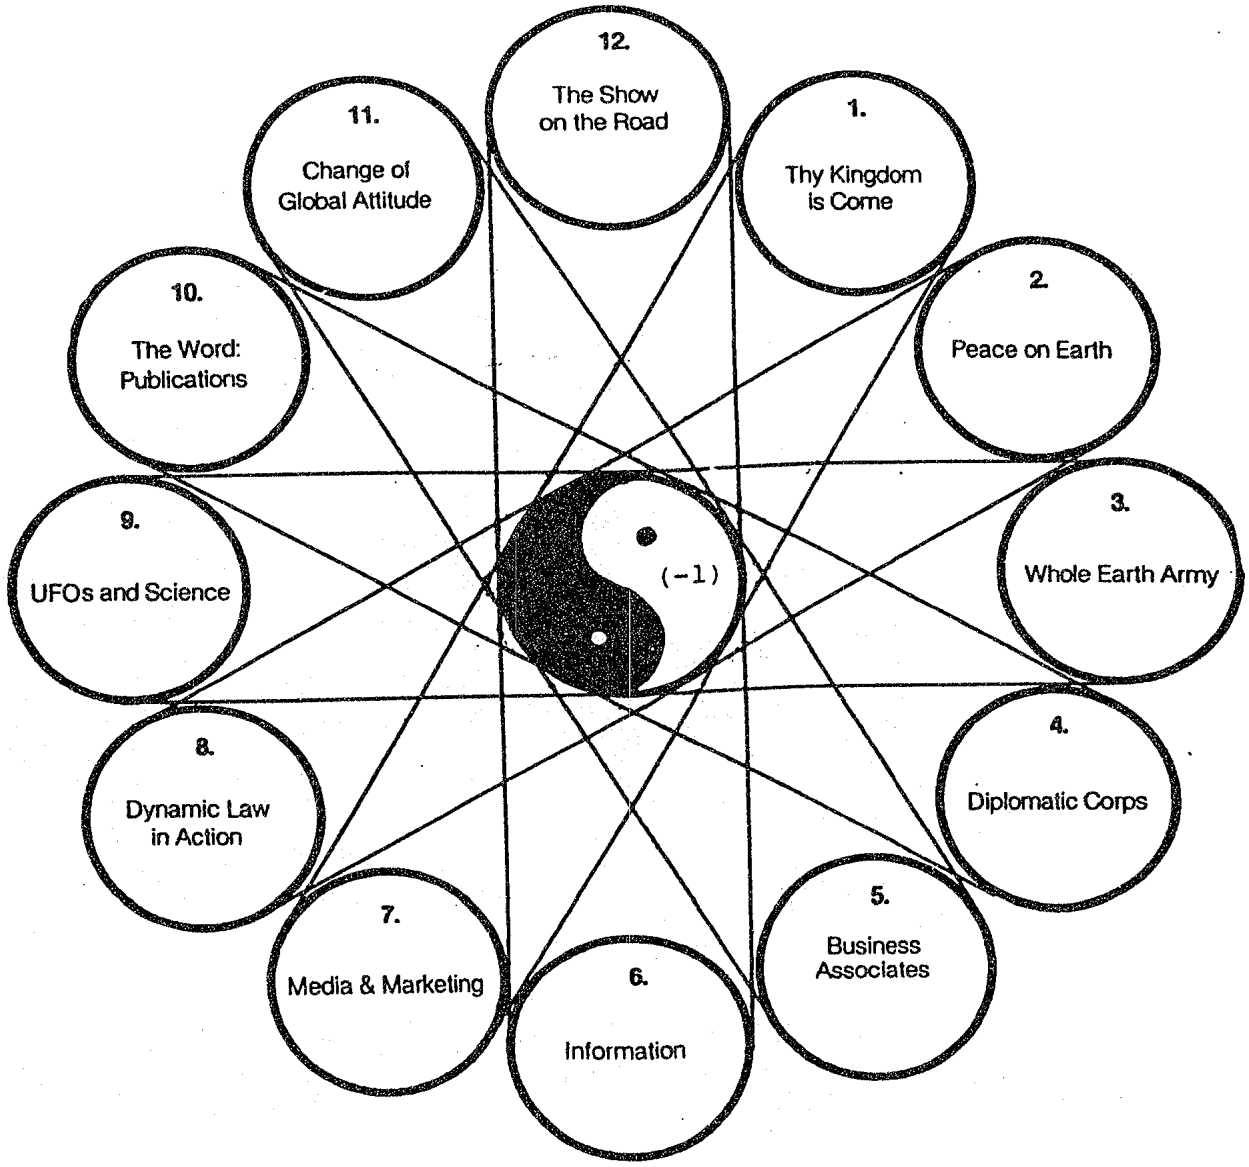


The air principle is the neutral balance point between the fire principle and the water principle. The scales represent neutrality, balance, and perfect justice in this world of polarities.

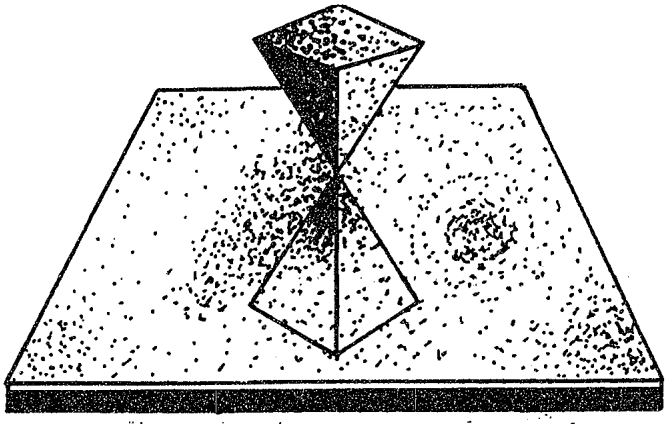


The above drawing is a cross section of the cosmic cube - the view of the "cut orange", showing how it operates "under the hood".

NB. The caterpillar entering at the right, experiences a maturing-crysalis effect to emerge at the (+1)+(-1) = 0 point as a butterfly in this illustration.



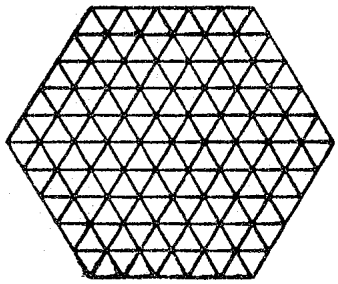
This drawing shows the operational method of a typical balance wheel within the cube as the data is brought into magnetic alignment with the centre point (+1)+(-1) at 0, by cross cancellation techniques. 12 of these wheels are balanced individually, before merging into the 13th. Only the "Elixir" mix of the 12 goes into the 13th Cube - which is THE CRISTAL CUBE.



To the left, a drawing of the pivot point (Cubit 66) which is the geographical centre of power in the Cosmic Cube Sphere.

See claim #26 - facing the SUPRA ORDINATE Factor at Point Zero.

THE COSMIC CUBE



To the right, the outside, (1 dimensional) view of the Cube. All knowledge is condensed by the mirror effect.

Below, the original findings map of the earths magnetic field
